

Monday 3 September								
Start	End	Item						
9:30	17:00	REGISTRATION. Main hall of the Department of Earth Sciences (Edificio de Geológicas)						
09:30	16:30	Meeting of the Working Group on Foraminiferal Classification						
10:30	13:00	Exhibition of Upper Cretaceous to Eocene benthic foraminiferal assemblages from Iberian sections						
14:30	16:30	Micropaleontological Laboratory, first floor						
17:30		Guided visit to the Aljafería Palace. Bus leaves from campus (meeting point A) at 17:30 o'clock						
19:30		Icebreaker party. Paraninfo Building						
Tuesday 4 September								
Start	End	Item	Chairs	Speaker	Title			
8:30	09:00	REGISTRATION						
9:00	09:10	WORKSHOP OPENING						
09:10	09:40	Opening lecture:		Johann Hohenegger	Species as the basic units in evolution, biodiversity and biostratigraphy			
09:40	10:10	Session 1 SYSTEMATICS	Johann Hohenegger Danuta Peryt	Keynote Jan Pawlowski & Maria Holzmann	Multiple origins of the agglutinated wall and the high-level classification of Foraminifera			
10:10	10:30			Michael A. Kaminski	Revisions and Updates to the Classification of the Agglutinated Foraminifera			
10:30	11:00			COFFEE BREAK				
11:00	11:20			Valeria Mikhalevich	Reinvestigation of two agglutinated genera of the order Textulariida Delage et Herouard, 1896 (Foraminifera)			
11:20	11:40			Assad Ghazwani et al.	New agglutinated foraminifera, including multichambered taxa, from the Middle Ordovician Hanadir Shale of Northern Saudi Arabia			
11:40	12:00			Maria Holzmann et al.	A molecular comparison of <i>Entzia tetrastomella</i> and <i>Jadammina macrescens</i>			
12:00	12:20			Michael A. Kaminski	New trochamminids with radially elongated chambers from the Paleozoic Black shales of Saudi Arabia: An adaptation for survival in dysoxic environments?			
12:20	12:50	Session 2 EVOLUTION & TECHNIQUES	Jarosław Tyszk Silvia Ortiz	Keynote Jarosław Tyszk	Foraminiferal design: Morphogenesis of agglutinated chambers			
12:50	13:10			Emil Platon	StrataPlot - a Graphic Correlation Software			
13:10	14:30	LUNCH BREAK						
14:30	15:00	Session 3 BIOSTRATIGRAPHY	Jenő Nagy Michael A. Kaminski	Keynote Jenő Nagy	Sequence stratigraphic application of foraminiferal facies patterns: Triassic and Jurassic examples			
15:00	15:20			Miroslav Bubik	Late Cretaceous <i>Uvigerinammia jankoi</i> lineage in the Carpathian Flysch			
15:20	15:40			Danuta Peryt	The Cenomanian/Turonian Boundary Event in the Sawin-19 borehole (SE Poland): restructuring of agglutinated foraminifera assemblages			
15:40	16:30	COFFEE BREAK						
16:30	18:30	Poster session & informal discussion						

Wednesday 5 September					
Start	End	Item	Chairs	Speaker	Title
9:00	09:30	Session 4 PALEOECOLOGY & PALEOENVIRONMENTS	Ellen Thomas Laia Alegret	Keynote Ellen Thomas	Agglutinated benthic foraminifera during ocean acidification: what holds them together?
09:30	09:50			Saleh Al Enezi et al.	The effect of the late Tithonian-Berriasian crisis on agglutinated foraminifera: the record from the base of the Sulaiy Formation, Saudi Arabia
09:50	10:10			Eiichi Setoyama et al.	Palaeobiogeography of Late Cretaceous agglutinated foraminifera in the Arctic, Atlantic and Tethyan regions
10:10	10:40	COFFEE BREAK			
10:40	11:10	Session 5 ECOLOGY	Andrew J. Gooday Fabrizio Frontalini	Keynote Andrew J. Gooday	Benthic foraminiferal squatters: species that inhabit the tests of other foraminifera
11:10	11:30			Eric Armynot Du Chatelet et al.	Environmental control on shell structure and composition of agglutinated foraminifera in the Marmara Sea
11:30	11:50			Ane Garcia-Artola et al.	Recent sea-level variations and salt marsh evolution in the northern coast of Spain: agglutinated foraminifera as proxies for anthropogenic climate change studies
11:50	12:10			Virginia Martins et al.	Agglutinated species in the assemblages of foraminifera of Ria de Aveiro (N Portugal)
12:10	12:30			Mary McGann	Dominance of the invasive agglutinated foraminifera <i>Trochammina hadai</i> Uchio in San Francisco Bay, USA, less than two decades after its introduction
12:30	12:50			Salwa Sanatul Hasan et al.	The distribution of <i>Miliammina fusca</i> in three different environmental settings of Malay Peninsular, Malaysia
12:50	14:30			LUNCH BREAK	
14:30	14:50			Mark D. Phipps et al.	A review of agglutinated foraminifera morphogroups: new data on "living" foraminifera from the Portuguese margin and their application in industrial palaeoenvironmental studies
14:50	15:10			Ashleigh Costelloe et al.	Comparison of modern foraminiferal population densities from the Caroni Swamp, Trinidad, and Cowpen Marsh, England
15:10	15:30			Andreea Telespan et al.	The life cycle of <i>Entzia</i> (Foraminifera) in the salt marsh at Turda, Romania
15:30	15:50			Lindsay Wilson et al.	A baseline survey of agglutinated benthic macro-foraminifera in the Barents Sea, Norway
15:50	16:20	COFFEE BREAK			
16:20	17:30	Poster session			
17:30		Closing ceremony and Awards			
19:45		Guided visit to Teatro Principal			
21:00		Conference dinner. Teatro Principal			

Thursday & Friday 6-7 September		
08:00		Field trip to the Basque Cantabrian basin (N Spain)
